

pegelWERK updates overdub STUDIO to version 1.1.1

The voiceover DAW now also handles audio-only work and removes noise on the device

Siegburg, Germany, June 2026. The independent audio software studio pegelWERK has updated overdub STUDIO to version 1.1.1. The update broadens the voiceover DAW beyond video work and moves more audio processing onto the device.

overdub STUDIO is built for editors, sports commentators, producers and anyone who needs to deliver a broadcast-ready voiceover, without a studio and without a sound engineer. The workflow is intentionally short: load the video, read your script from the built-in prompter, record. Auto Edit removes pauses while you record, Auto DSP brings the voice to a clear, even broadcast level to EBU R128, and Auto Mix balances voice, music and the original sound in one click. The export embeds the finished mix directly into the source video, and MXF integrity is preserved end to end on macOS.

NEW IN VERSION 1.1.1

- An audio-only mode for podcasts and audiobooks, with no video track
- On-device neural noise removal (DeepFilterNet 3) that runs entirely locally, with no external plug-in and no upload
- A manual channel strip (Monitor, Noise, Comp, Air, Body) for full control when you want to adjust the automatic processing

The built-in prompter now runs on both macOS and iPad, following the voice through on-device speech recognition.

AVAILABILITY AND PRICING

overdub STUDIO is available as a subscription. On macOS it is 24.99 euros per month or 249 euros per year, direct from pegelwerk.com. On iPad it is 12.99 euros per month or 129 euros per year through the Apple App Store. A free trial is available on macOS. All other pegelWERK apps remain one-time purchases.

ABOUT PEGELWERK

pegelWERK is an independent audio software studio based in Siegburg, Germany, founded by Sascha Hömske. The line covers six native apps for macOS, iPadOS and iPhone for broadcast, post-production and voiceover: broadcast METER, mini METER, loudness CORRECT, easy EDITOR, instant PLAYER and overdub STUDIO. All apps share the same EBU R128 DSP engine.
